#### INSTRUCTIONS.

- 1. Interface all parts of the bag pattern as marked.;
- 2. Fold and stitch the handles; attach the handles to the main fabric on the place marks as shown on the pattern. Attach the handle edges with zigzag then do the rest of the stitches;
- 3. Install zipper along the lines shown on the pattern placing it between the main fabric and the lining;
- 4. Fold and stitch side panels;
- 5. Fold and stitch the little side handles as shown on the pattern;
- 6. Attach side handles as shown on the pattern;
- 7. Fold the edges with the zipper ends towards the sides of the box (as shown on the pattern) placing the zipper ends over the side handles and stitch;
- 8. Attach side panels to the sides of the box as shown on the pattern hiding all the seam edges inside. You can do it two ways: attach the side panel and treat the seam edge with bias binding or you can attach one part of the side panel, then flip the other side over the seam hiding it inside and stitch.
- 7. Stitch side panel shorter edges along the lines shown on the pattern so that three sides of the side panels are attached to the box thus holding the box together.
